

The slide features a light gray background with decorative pixelated patterns in the corners. The top-left corner has a pattern of teal and black pixels, while the bottom-right corner has a pattern of green and black pixels.

Visualization Systems

John C. Hart

Department of Computer Science
University of Illinois at Urbana-Champaign

Visualization Systems

- **Information Visualization**
- **Large Data Visualization**
- **Visual Analytics**
- **Dashboard**

Visualization Systems

- **Information Visualization** – plotting data often using different coordinates than what is provided
- **Large Data Visualization**
- **Visual Analytics**
- **Dashboard**

Visualization Systems

- **Information Visualization** – plotting data often using different coordinates than what is provided
- **Large Data Visualization** – how to interactively manage visually overwhelming amounts of data
- **Visual Analytics**
- **Dashboard**

Visualization Systems

- **Information Visualization** – plotting data often using different coordinates than what is provided
- **Large Data Visualization** – how to interactively manage visually overwhelming amounts of data
- **Visual Analytics** – connecting the process of data visualization with the process of decision making
- **Dashboard**

Visualization Systems

- **Information Visualization** – plotting data often using different coordinates than what is provided
- **Large Data Visualization** – how to interactively manage visually overwhelming amounts of data
- **Visual Analytics** – connecting the process of data visualization with the process of decision making
- **Dashboard** – how to organize the visual display of information to provide only the necessary details
